

GemSeal® Sand Mix Sealer

GemSeal Sand Mix is a premium refined concentrated coal tar emulsion sealer, designed for application to commercial asphalt pavement surfaces. Preblended polymers and sand additives are blended during the manufacturing process to ensure maximum sand suspension. This process eliminates the need for any additional sand or additives, which saves time and money.

DURABLE

- Blended with sand and polymers for increased durability and skid resistance
- Resists penetration by water, fuel, and oil
- Outstanding wear resistance

PROTECTS & PRESERVES

- Weatherproofs and seals porous asphalt surfaces
- Blocks UV rays to guard against oxidation

CONSISTENT

- Manufactured using colloid mill process for uniform emulsion particle size and distribution
- Deep, rich black color

SAFE & EASY TO USE

- Conforms to industry-leading quality control program
- Meets or exceeds requirements for ASTM D 5727 Emulsified Refined Tar (Mineral Colloid Type) (replaces Federal Specification R-P-355e) and ASTM D 6945 Emulsified Refined Tar (Commercial Grade), Type I and Type II

GemSeal manufactures, supplies, and specifies pavement preservation products nationwide including sealers and additives, lot marking paints, crack sealants, pothole patches, primers, tools, and equipment. For over 60 years, we have been defined by our products, value, delivery, and customer support. We guarantee exacting quality control and consistent results on every jobsite nationwide.
